Customer Intelligence solutions for businesses

Technology stack: JavaScript, NodeJS, BackboneJS, React, HTML5, LESS, Foundation

- Built user interfaces with HTML5(Templating systems: Handlebars.js, Mustache.js)
- Implemented responsive design using Foundation & LESS
- Used Backbone.js to interact with RESTful APIs (Facebook, Twitter)
- Implemented feature on our platform that allowed clients to directly reply to their customers' comments on their social media pages(Facebook & Twitter)

EDUCATION & TRAINING

Web Accessibility Training - CTM America Corporate Office(2/25 - 2/26)

2020

Web Accessibility Training - WebAim at Utah State University(3/2 - 3/3)

2016

Web Development Immersive - General Assembly Los Angeles

April - June 2014

Learned full stack web development through program's 60-80 hour a week, project-based curriculum. In three-week cycles, I completed four major web applications. Primary technologies used: Ruby on Rails, JavaScript, Angular, PostgreSQL, MongoDB, Heroku, Twitter Bootstrap, Foundation, SASS, HTML5, and CSS.

Bachelor of Arts in Psychology - University of California Los Angeles

2012
